

Construction projects for Nurafshan considered

President Shavkat Mirziyoyev became familiar with construction projects, implemented in Nurafshan.

As is known, in 2017, the Administrative Center of Tashkent region moved to Nurafshan. The Head of the state, during his visit in 2019, gave instructions for the construction of modern facilities.

Practical activities carried out since the last visit were considered today. The Head of the state was informed about the construction works under Nurafshan's master plan.

Currently, Tashkent Road has been expanded, and 42 facilities have been built along with it. The construction activity continues consistently. Seven- and nine-storey apartments, administrative buildings, business centers, hotels, medical and educational institutions, hypermarkets are being built on the site of old one-storey buildings.

Measures to develop culture, education and healthcare in Tashkent region were presented.

The President noted that along with the construction of schools and kindergartens, it is necessary to enrich the content of education, to move from numbers to quality. The instruction was given to organize a modern hospital in a convenient place for the population, to turn it into a clinical base for training qualified specialists.
